

<b>To do</b>		<input checked="" type="checkbox"/>
<b>Keeping up with any updates during Covid-19 pandemic</b>		
Check your emails regularly as UCAS, student finance England (SFE) & institutions will communicate with you this way.		
Follow social media accounts of organisations like <a href="#">WIN</a> , your College/6 <sup>th</sup> form, <a href="#">SFE</a> , <a href="#">UCAS</a> & <a href="#">Discover Uni</a> as they will post updates. Also follow your university's social media for updates/information.		
<b>Offers</b>		
Check all offers on <a href="#">UCAS Track</a> & any emails you have been sent. Contact a WIN HEA, your careers team or your university if you are unsure about any of your offers.		
Make sure you have replied to your offers on <a href="#">UCAS Track</a> before the deadline		
Check if there is any additional paperwork the university need (e.g. qualification certificates or ID).		
<b>Accommodation</b>		
Research accommodation options available for you. You will need to consider: price, location, facilities, sharing options & accessibility		
Make sure you are aware of how much the deposit is & when this needs to be paid (you may need to save up for it over summer).		
Apply for accommodation. Most places will ask you for a ranked ordered list of your preferences. They should email you details of this or will be on the accommodation pages of their website.		
<b>Finance</b>		
Complete the SFE <a href="#">online form</a> , parents will also have to complete a supporting application. Do this ASAP so you can make sure you have funding in place for the start of term.		
Use the <a href="#">student finance calculator</a> to give you an idea of how much funding you could get. Once you have an idea, you can start budgeting, working out what you have to pay for & when. You can find budget calculators at <a href="#">save the student</a> .		
If you have a long-term health, mental health or additional learning need, you can also apply for <a href="#">Disabled Student Allowance</a> .		
Research any additional <a href="#">financial help</a> , scholarships & bursaries that you might be able to apply for. You can find details on the <a href="#">Scholarship Hub</a> website as well on your university's website.		
<b>Moving away</b>		
Write/find a list of what you will need to pack and take with you. There are some useful guides from <a href="#">UCAS</a> and <a href="#">Save the Student</a>		
<b>Research the place</b>		
If you are moving/commuting somewhere new, spend some time researching the area & transport links. Try a Google search of 'A student guide to..'		
Check your university's website & social media for information about the area for new students.		
<b>Academic preparation</b>		
Find/ask for a reading list to read around your chosen subject. Also keep up with subject-relevant news & any developments on online journals/videos or search for any introductory books/videos.		
Check if there are any specific resources you may need (e.g. art supplies, computer hardware or software).		
<b>Emotional preparation</b>		
Starting university can be scary, even if you are staying at home. You are not alone in having those feelings. The student minds website has some useful information including this <a href="#">'Know before you go'</a> guide.
